

HEALTHCARE MANAGEMENT

COURSE DESCRIPTION

A DIPLOMA course in Healthcare Management prepares students to develop, coordinate and manage Healthcare operations and services. This diploma course will also provide the necessary knowledge to pursue an advanced degree at the Institute of Health Management, if desired.

CAREER OPTIONS FOR GRADUATES: Graduates of the Healthcare Management diploma course may pursue positions in hospitals, clinics, health insurance companies, private physician practices, rehabilitation centers, and other healthcare organizations. Current students of the Institute of Health Management may also choose to take this course as an elective in their respective degree program.

Overview of Topics: Healthcare systems operation and management, healthcare organizational design and behavior, human resource management in healthcare, healthcare operations management, and international health laws and regulations.
