

HOSPITAL SUPPLY CHAIN MANAGEMENT

COURSE DESCRIPTION

A DIPLOMA course in HOSPITAL SUPPLY CHAIN MANAGEMENT is designed for students of healthcare management or professionals in the field of healthcare to provide an insight into the process required for managing the hospital supply chain. This diploma course will also provide the necessary knowledge to pursue an advanced degree at the Institute of Health Management, if desired.

CAREER OPTIONS FOR GRADUATES: This course thoroughly prepares you for a dynamic career with medical device manufacturers, pharmaceutical firms, private and public sector hospitals, medical supply distributors, and other segments of the constantly evolving healthcare industry.

OVERVIEW OF TOPICS: Hospital Supply Chain Management will provide a brief introduction to materials management and inventory fundamentals; the drug and pharmaceutical industry; strategic supply chain management; forecasting, planning, inventory control; and healthcare information systems.
