

DOW UNIVERSITY OF HEALTH SCIENCES. DOW INSTITUTE OF RADIOLOGY.

THREE MONTHS CERTIFICATE COURSE IN SMALL PARTS-ULTRASOUND.

Introduction:

Ultrasound technology has continuously evolved and expanded its applications in the field of medical and surgical practices. Dow Institute of Radiology, Dow University of Health Science believes that sonologists should possess a comprehensive skill set that includes not only basic abdomen and pelvis ultrasound but also small parts ultrasound, covering areas such as the thyroid, breast, testes, B-scan and the assessment of various lumps and bumps.

Our educational program is designed to empower candidates to develop and enhance their expertise in small parts ultrasound, keeping them up to date with emerging knowledge and best practices in this specialized field. This course will provide candidates with the necessary knowledge and skills to excel in the difficult and essential task of diagnosing small parts pathologies through ultrasound imaging. We are committed to fostering a learning environment that promotes excellence, innovation, and the highest standards of patient care.

Program Length:

Three Months (12 weeks).

Eligibility:

- MBBS
- Valid PMDC Registration
- Must have completed Basic Certificate course in Ultrasound from a reputable center OR having experience in Ultrasound

Awards: 03 months Certificate in Small Parts ultrasound

Timing of Training: Monday till Saturday: 9 AM till 03 PM

Methodology: Lectures, power point presentations and case study discussions, skills training and demonstration and audio/visual aid.

Evaluation: Students will receive a certificate for this course. Methods of evaluation, although determined by the individual lecturer/instructor, should include some combination of the following:
